## ABSTRACT

*The television news is one of the medium which is able to be used to prop speaking learning at elementary school. Giving comment is one of competency which must be gained by fifth students of elementary school. From the result of observation, it was found a fact that the fifth students of Banyuajuh elementary school felt some difficultness when they want to say something orally in learning activity. This research is done to: (1) describe the application of learning by using television news to improve the ability of students' speaking, (2) describe the improisavtion of speaking ability which is gotten by the students. This research use collaborative model of cycle Classroom Action Research (CAR). Each cycle consist of planning, acting & observing, reflecting, and revise plan. This research is done at fifth class of Banyuajuh I elementary school with 35 students of the fifth class. The data is gotten by observing, interviewing, documenting, and speaking test. The research instruments are observing guidance, interview guidance, and questions test. The data is analized in descriptive, both qualitative and quantitative analize. Speaking learning by using television news shows the improve of students activity in speaking. The class condition is quiet when the news was being showed and the students were paying attention to the news. The students also snatch to give comment to the news which has showed. The ability of the students are also improve, it is showed by the students which are in very good qualification in first cycle is 57,6%, increase become 81,82% in second cycle. The reason which is talked and the words which is used in the second cycle are better than the first cycle.*
